

# **First Quarter Monitoring Report On Disinfestation Activities**

## **(Jan- March) 2024**

### **Introduction:**

Disinfection and Disinfestation are exercises carried out to control insects of public health importance. The report covers the disinfestation exercise carried out in the first quarter 2024. The exercise was supervised and monitored on 13<sup>th</sup> March 2024,

### **Objectives:**

To control insects and vectors of public health importance.

### **Activity:**

The disinfestation exercise was carried out by NAMCOP and was supervised by the Environmental Health staff and Zoomlion District Manager of the Kwaebibirem Municipal Assembly. The chemical used were very effective against cockroaches and mosquitoes. The disinfection was carried out at the sanitary sites such as public refuse container sites, public toilets this is done to prevent possible transmission of diseases. Also, the junior staff quarters and residency were also disinfested

### **CHEMICAL USED**

Sunpyrifos

### **OBSERVATION**

- Some of the sprayers were not wearing hand gloves, some not in Wellington boots and nose masks which are basic protective equipment.
- It was observed that the chemical used was very effective against cockroaches and other flies

### **RECOMMENDATIONS**

- It is recommended that, the Zoomlion Ghana limited provide full personal protective equipment for their safety for the sprayers

The areas Disinfested during the period under review are stated in the table below
